

Insight into the European Derivatives Market

European Financial Futures & Commodity Products, Technology and Key Structural Differences to the U.S. Marketplace

Eurex University Training Program

Fundamentals Seminar

Title:

The Role of an International Derivatives Exchange: Futures & Options Products and Trading Technology

– An Introduction to Eurex Products, Market Model and Trading

Speaker:

Steven Stasys is a Vice President of Sell Side Business Development at Eurex.

Description:

In this 90-minute seminar, Steven Stasys will introduce the exchange-traded derivatives markets and discuss the role of an international exchange in terms of products and technology.

Steven will begin with an overview of Eurex as one of the largest derivatives exchanges in the world. He will then give a comparison between the U.S. and European market models. Give your students the opportunity to:

- Learn the similarities and differences in market models between the U.S. and European markets
- Understand the international nature of the global financial markets
- Gain insights into key terms used in the financial press and current issues such as financial reform, high-frequency trading, etc.
- Learn about trading strategies implemented by market participants to help the risk reward dilemma
