

Bio:

Dr. Lourenco Miranda is Vice President (Quantitative Development) at U.S. Bank in Minneapolis, MN. In that capacity, Dr. Miranda is responsible for quantitative modeling within Corporate Treasury. Before that, he was Senior Risk Officer for the International Finance Corporation (IFC), the private sector arm of the World Bank Group. There, Lourenco worked as a global advisor to IFC financial markets Clients in developing or frontier countries, assisting local Banks to implement or improve their internal risk management practices. Lourenco has hands-on experience in banking and finance in more than 30 countries in South America, South and East Asia and Eastern Europe. Before the World Bank, Lourenco held other positions in financial institutions like ABN AMRO Bank and Santander Investment Bank, with more than 14 years of relevant experience in the industry. In the academic arena, Lourenco has worked in different academic centers in the world, such as in Brazil, the Netherlands and Russia, working as a visiting professor or research collaborator. For a long period of time, Lourenco was also the Regional Director for the Global Association of Risk Professionals (GARP) in Brazil. He holds a PhD in Statistical Physics and - apart from all that - Lourenco is father of triplets.
